

Pathway for Individualised MDT assessments at ChildVision

Referral Source: Parent/professional contacts ChildVision regarding a request for an assessment for young person with a visual impairment with/without additional disabilities.

Team Coordinator sends referral form to parent/professional along with initial letter detailing the assessment process. The client's assessment form will be screened by the team once referral background form, Ophthalmology and clinical therapy reports are received

Triage –Screening
Date given for Assessment

Reminder letter sent out two weeks prior to Assessment Date

Client attends for Individual team assessment over 2 days.
Team meet on the second day of assessment to discuss recommendations
Team meet with parents/child/professionals to discuss recommendations

Team reports and recommendations sent within 4 weeks to parents/ teachers/ professionals (as required)

Option 1:

Report and recommendations sent only usually when the young person is living outside the Dublin area and/or already has full services and only requires advice and recommendations

Option 2

Child/Family offered FR support and placed on Database for receipt of all relevant information.
